

MailStream Plus Release 8.3.5.S01 - Update for non-Machinable Flats being placed in FSS bundles and containers (MSPLUS-9657)

We have learned of an issue with MailStream Plus™ Release 8.3.5 that affects the sorting of non-machinable USPS® Marketing Mail flats, and non-machinable Package Services™ bound printed matter flats. MailStream Plus is placing carrier route qualified mailpieces into FSS bundles and containers, which is not allowed for non-machinable mailpieces. Software update 8.3.5 S01 is required for all clients producing mailings of USPS® Marketing Mail flats and bound printed matter flats that contain non-machinable flats. You can now download software update 8.3.5 S01 from our [Support Site](#) or the [Pitney Bowes eStore](#).

This software update requires you to apply a new January Postal Reference File (PRF). An updated version of the January PRF is available from our [Support Site](#) or the [Pitney Bowes eStore](#). If you have previously downloaded the January PRF, please replace it with this updated version. If you have already loaded the February PRF, please note that the February contains the required update and does not need to be replaced. If you have any questions or concerns, please contact Technical Support at 800-367-6950.

This issue will be corrected in the upcoming MailStream Plus 8.3.6 release, scheduled for late March 2018.

Regards,

Amy Connolly Musumano
