U.S. Routing Data Contents

Data Source and Vintage

The MapInfo Routing J Server 2.5.1 is based on data from Geographic Data Technology (GDT) Dynamap/Transportation version 4.3(October 2002).

The new data contains a limited Canadian network from the North American Transportation Database (NORTAD 1998), U.S. Dept. of Transportation. This network allows you to take logical paths across Canada when it makes sense (e.g. Alaska to Seattle, Buffalo to Detroit, etc.).
